BIOFERTIN 10-4-3

BIOFERTIN 10-4-3 is a guaranteed totally natural organic fertilizer, specially designed to offer a large amount of organic nitrogen fully available to the crops. It contributes to the soil fertility in two levels:

- 1) Nutritional Level: Supplies nitrogen and all the other vital elements to the plants in the highest quality and quantity.
- 2) Biological Level: Contributes to the rhizosphere rejuvenation by offering a large amount of organic matter to the soil (metal chelation, growth stimulation).

APPLICATION:

BIOFERTIN 10-4-3 can be applied with any manure or fertilizer distributing equipment and is suitable for all crops.

Application Rate: Generally it is applied at the following application rate.

Starter fertilization: 400-1,000 kg/ha.

STANDARD ANALYSIS	(w/w) %
Nitrogen (N)	10.00
Phosphorus (P ₂ O ₅)	4.00
Potassium (K ₂ O)	3.00
Humidity	8.00
Organic matter	65.00

PHYSICAL PROPERTIES:

Appearance: Brown granules
Solubility: 100% water soluble
pH: 5.5-6.5
