

# Biofertilin

ORGANIC GRANULAR  
SLOW RELEASE FERTILIZERS

**bio**  
Certified organic

The organic slow release granular fertilizers **BIOFERTIN** are produced by high quality organic raw materials that come from plant and animal by-products and natural minerals. Through constant monitoring of the fertilizer's qualitative characteristics starting from production to packing and continuous controls of both the raw materials and the final product, it is being ensured that the organic granular fertilizers **BIOFERTIN** comply with all national, european and international rules concerning the safety of the product .

**AVAILABLE TYPES**

- 10-4-3
- 6-8-15
- 6-15-3

**CROPS**

- Vineyards
- Tree crops
- Vegetables-Horticulture
- Field crops (cereals, cotton, corn)
- Fodders
- Ornamentals
- Landscapes and Lawns
- Gardens and Turfs
- Greenhouse crops

**PROPERTIES**

- They offer nutrients for the plants from Mother Nature.
- Gradual release of nutrients offering stable plant growth.
- Nutrients are easily absorbed and assimilated by the plants.
- Nutrients do not leach or evaporate.
- They are specially formulated in granules of 0.8 - 4.0 mm diameter for easy and practical use.

**STANDARD ANALYSIS**

	10-4-3	6-15-3	6-8-15
Total Organic Nitrogen (N)	10 %	6 %	6 %
Total Phosphorus (P <sub>2</sub> O <sub>5</sub> )	4 %	15 %	8 %
Total Potassium (K <sub>2</sub> O)	3 %	3 %	15 %
Calcium (CaO)	6 %	20 %	10 %
Magnesium (MgO)	0.5 %	0.5 %	1.5 %
Sulphur (S)	1.5 %	1.5 %	4.5 %
Trace elements (B, Fe, Zn, Mn, Cu)	1 %	1 %	1 %
Humidity	8 %	8 %	8 %
Organic matter	65 %	45 %	40 %
pH	5.5 - 6.5	5.5 - 6.5	5.5 - 6.5

**PACKAGES**

Bag	25 kg	pallet of	36 bags
*Big Bag	1,000 kg		-

\*Available upon request
