

Biofertilin-L

7 - 0 - 0

LIQUID ORGANIC FERTILIZER

BIOFERTIN-L 7-0-0 is a liquid organic fertilizer, produced by mild enzymatic hydrolysis of natural proteins (collagen). This production process guarantees the preservation of the essential amino acids and a high rate of organic nitrogen deriving exclusively from amino acids. It can be used as a:

- ♦ organic nitrogen fertilizer
- ♦ sticking - wetting agent
- ♦ recovery biostimulant after periods of intense stress
- ♦ qualitative and quantitative characteristics improvement stimulant
- ♦ chelating agent

STANDARD ANALYSIS

- Nitrogen (N)7 %
- Amino acids43 %
- Chlorine (Cl).....<1 %

CROPS

- Vegetables-Horticulture
- Strawberry
- Melon-Watermelon
- Potato
- Carrot-Onion-Beet root
- Trees (Citrus, Stone fruits, Olive trees)
- Vineyard
- Kiwi
- Ornamental plants-Forest shrubs
- Flowers
- Lawn-Turfs
- Cereals
- Fodders
- Cotton
- Corn

PROPERTIES

- It increases crops yield and quality.
- It provides readily available to plants nitrogen and potassium.
- It enhances plants resistance against stress.
- It improves the efficiency of chemical fertilizers and pesticides.
- It accelerates the biochemical processes that take place inside plants (photosynthesis, sugars formation).
- It promotes fruit growth.
- It assists with metal micronutrients uptake by plants.

PACKAGES

Plastic Bottle	250 ml	box of	50 pieces
Plastic Bottle	1 l	box of	12 pieces
Plastic Cont.	5 l	box of	4 pieces
