

# Crystal Fertilizers

for amateur growers

TOTALLY WATER SOLUBLE FERTILIZERS  
WITH TRACE ELEMENTS

The series **Crystal Fertilizers** consists of totally water soluble N-P-K fertilizers, which contain the three main plant nutrients (nitrogen, phosphorus and potassium) in various proportions. Additionally, **Crystal Fertilizer** fertilizers are enriched with an excellent mixture of readily assimilable trace elements (iron, zinc, copper, manganese, boron, molybdenum), which play a key role in plants growth and good health.

**AVAILABLE FORMULATIONS**

- **CF-70:** for young plants and root shooting
- **CF-61:** for balanced growth
- **CF-60:** for flowering
- **CF-56:** for fruit improvement
- **CF-55:** for maturing
- **CF-50:** for a rich foliage and growth

**CROPS**

All crops

**PROPERTIES**

- They offer grower the possibility to choose the most appropriate formulation for his crop, according to the nutritional needs of plants, their growth stage and the unique characteristics of soil.
- They cover the nutritional needs of all crops, since there are many N-P-K formulations available, combining various proportions of nitrogen, phosphorus and potassium.
- They enhance crops yield and quality.
