

SEED COATING MICROBIAL INOCULANT

Bean & Pea - Starter

Beneficial seed coating bacteria	1,0 %
Beneficial microbial population	2×10^9 cfu*/g
Inert pasteurized materials	99,0 %

(*cfu: colony forming units)

Bean & Pea - Starter is applied on the bean and pea seeds prior to sowing for the beneficial bacteria to initially establish themselves on the seeds and afterwards the plants' roots. The included strains of bacteria in **Bean & Pea - Starter** are essential for cultivating beans and peas as they:

- Increase seed germination throughout the crop's duration
- Stimulate the awakening of dormant seeds
- Promote the plants' development
- Increase yield
- Promote the root system's development

APPLICATION METHOD: **Bean & Pea - Starter** is applied on the bean and pea seeds by dusting and mixing. It is important that **Bean & Pea - Starter** is dispersed as uniformly as possible on the seeds to achieve total seed coating.

APPLICATION RATES: 1 Kg is capable of coating 90-200 Kg of bean seeds or/and 200-230 Kg of pea seeds depending on the cultivar.

Notes: *Emptying the content must be done diligently for the powder to detach itself completely from the bag's walls so that the full microbial load of the product may be used. Apply the whole content of the bag within 24 hours of opening it.*

COMPATIBILITY: It can be combined with most seed treating fungicides. It cannot be combined with bactericides and soil disinfectants.

STORAGE CONDITIONS: The product must be stored in room conditions (15-20 °C). Keep it away from direct sunlight as well as any source of heat. Empty envelopes must not be reused.

PRECAUTIONS: It is not harmful for humans and animals. If it falls on your skin or clothes, wash well your skin with soap and water. If it falls in your eyes wash off with plenty of water. If the irritation persists, seek medical help.

KEEP OUT OF REACH OF CHILDREN

SHELF LIFE: One (1) year from the displayed manufacture date of the product.

MICROBIAL INOCULANT IN LIQUID FORM

Bean & Pea - Starter fluid

Beneficial seed coating bacteria.....	1,0 %
Beneficial microbial population	2×10^9 cfu*/ml
Inert pasteurized materials	99,0 %

(*cfu: colony forming units)

- Increases seed germination
- Stimulates the awakening of dormant seeds
- Promotes plants' development throughout the crop's duration
- Increases yield
- Promotes the root system's development

MICROBIAL INOCULANT IN LIQUID FORM

Bean & Pea - Starter fluid

Bean & Pea - Starter fluid is applied on bean and pea seeds prior to sowing for the beneficial bacteria to initially establish themselves on the seeds and afterwards the bean and pea roots.

APPLICATION METHOD: *Bean & Pea - Starter fluid* is applied to bean and pea seeds by spraying or immersing them, after it has been diluted in a proper quantity of water to achieve uniform and complete wetting of the seeds. It is important that **Bean & Pea - Starter fluid** is applied as uniformly as possible on the seeds to achieve total seed coating.

APPLICATION RATES: 1 L is capable of coating 90-200 Kg of bean seeds or/and 200-230 Kg of pea seeds depending on the cultivar.

Notes: Emptying the content must be done diligently for the full microbial load of the product to be used. During treating each batch of seeds the whole solution must be

used and be absorbed fully by the seeds before treating the next batch.

COMPATIBILITY: It can be combined with most seed treating fungicides. It cannot be combined with bactericides and soil disinfectants.

STORAGE CONDITIONS: The product must be stored in room conditions (15-20 °C). Keep it away from direct sunlight as well as any source of heat. Empty containers must not be reused.

PRECAUTIONS: It is not harmful for humans and animals. If it falls on your skin or clothes, wash well your skin with soap and water. If it falls in your eyes wash off with plenty of water. If the irritation persists, seek medical help. **KEEP OUT OF REACH OF CHILDREN**
